EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. Authorization for this examiner's amendment was given in a telephone interview with Kent J. Siefert (Reg. # 41,312) on 5/6/2009.

3. The application has been amended as follows:

In the Claims:

Please AMEND claim 1 as follows:

Claim 1 (Currently amended) A method comprising:

applying, with a network device, changes to candidate configuration data of ~~a~~ the network device;

applying an implementation-specific configuration policy to validate the changed candidate configuration data for compliance with specific operational requirements of the particular networks within which the network device operates, wherein the implementation-

Art Unit: 2451

specific configuration policy comprises a set of user-defined rules representing the specific operational requirements; and

selectively committing the changed candidate configuration data to operational configuration data based on a result of the validation.

Please AMEND claim 15 as follows:

Claim 15 (Currently amended) A system comprising:

a memory to store operational configuration data and candidate configuration data; and
a control unit to apply an implementation-specific configuration policy to validate changes to the candidate configuration data for compliance with specific operational requirements of the particular networks within which the system operates, and selectively commit the changed candidate configuration data to the operational configuration data based on a result of the validation, wherein the implementation-specific configuration policy comprises a set of user-defined rules representing the specific operational requirements.

Allowable Subject Matter

4. The numbering of Original Claims 1-46 is maintained. No original Claims have been cancelled.

Art Unit: 2451

5. The following is an examiner's statement of reasons for allowance:

The Office has deemed Applicant's latest set of claim amendments and corresponding arguments persuasive to overcome the current rejection in view of the applied prior art references, with respect to the following features:

A method comprising:

applying, with a network device, changes to candidate configuration data of ~~a~~ the network device;

applying an implementation-specific configuration policy to validate the changed candidate configuration data for compliance with specific operational requirements of the particular networks within which the network device operates, wherein the implementation-specific configuration policy comprises a set of user-defined rules representing the specific operational requirements; and

selectively committing the changed candidate configuration data to operational configuration data based on a result of the validation.

Specifically, Applicants argument that the present claims requires a particular type of validation--that of ensuring compliance with specific operational requirements of the particular network in which the device is deployed – and that this is not expressly disclosed by the prior art reference(s) is found persuasive. Applicant's further arguments that Viswanath does not explicitly teach or suggest this requirement, as it is directed to syntactical validation and

Art Unit: 2451

semantic verifications; and that in Canada, policy rules specify what the router does with network traffic and are applied by the router to network traffic when the traffic is received, are in contrast to the implementation-specific configuration policy of the claimed invention as they are applied to configuration data (not network traffic as in Canada) to validate the changed configuration data in view of the operational requirements (not to forward traffic as in Canada) are also found to be persuasive.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Glenford Madamba whose telephone number is 571-272- 7989. The examiner can normally be reached on Monday-Friday 7:00AM-4: 30PM, first Fridays OFF.
